

2018 Annual Report

Message from the Health Commissioner

Dear Residents of Lucas County,

In 2018, the Toledo-Lucas County Health Department continued upon its journey towards a vision that is innovative and forward thinking. The hardest parts of any transformation are knowing where to begin and maintaining momentum. This new vision will take time to be realized but our patient and determined efforts will provide for a more robust public health response. These innovative and forward thinking processes have begun in many programs including the reorganization of clinical services, the response to Ebola concerns, improved handling of water quality issues, a robust response to diseases and outbreaks, and working to ensure healthier homes for residents, to mention a few. Improving how we deliver public health will always focus on efforts that keep our entire community healthy and informed of emerging issues which may impact anyone who lives, learns, works, or plays in Lucas County. Keeping informed is key to keeping healthy.

As we look to the future of the department and our work to improve health in our community, it is essential to understand why and how we safeguard public health. In 2018, the foundation was set to review all programs to increase efficiency, improve return on investment, and enhance the understanding of our services both internally and externally. This first of many steps will continue into 2019 and beyond and will challenge us to strengthen our continuous quality improvement processes until they are ingrained as second-nature in our department's culture.

I'd like to take this opportunity to thank the exceptional staff at the Toledo-Lucas County Health Department working to deliver outstanding public health to our constituents. Each is passionate and committed to protecting the health and wellbeing of all who live, learn, work, or play, in Lucas County. They are the backbone to improving health in Lucas County, and for that I am thankful for them.

If you have any questions about the department, the programs we offer, or would like to visit the department, please call me so that can be arranged.

Yours in Health,

Eric J. Zgodzinski, MPH, RS, CPH
Health Commissioner

Letter From the President

The Annual Report for the Toledo-Lucas County Health Department in 2018 shows numerous activities and programs accomplished by a staff committed to the ongoing health of our community. These numbers represent only a portion of the work that is done to prevent disease and promote health. This staff is joined by the TLC Board of Health, community members who dedicate time and talent to monthly Board meetings and numerous committee meetings to offer advice and vision to a strategic plan for our regional health district.

With the reorganization of some of our clinical services in the past year, we look forward to 2019 with a goal of broadening our efforts in the area of "population health". This will enable us to better assess community problems that are particular to our area and our populations: think geographic and environmental situations related to Lake Erie and water quality or Toledo's older homes with lead issues affecting our children, drug and tobacco abuse, and the list goes on.

We will continue our efforts with health education for disease prevention, health maintenance, and chronic disease management, with improved data collection. We welcome your support and invite your ideas. After all, public health is everyone's business!

To your good health,

Donna Ailport Woodson, MD
President, Toledo-Lucas County Board of Health
